

Vision

The citizens of Europe live in an open society. Individuals are empowered and shape Europe's future. The citizens of Europe are sovereign. They exercise the legislative power through the European Parliament and European citizens' initiative. The Rule of Law guarantees their political and civil rights.

Liberals from across Europe and all walks of life come together in a diverse party to build a continent where "the only fields of battle will be markets opening up to trade and minds opening up to ideas".

Mission

The Individual Members act as a voice for European liberal democrats that are committed to:

- » building a free, fair, sustainable and open society;
- » a Europe based on the Rule of Law, democracy, and separation of powers;
- » creating a federal Europe based on the principle of subsidiarity, because European problems require European solutions;
- » the empowerment and more participation for citizens in European decision-making;
- » engaging and connecting liberals in building a more diverse and member-driven pan-European party.
